

PROBLEM SOLVING STAINS

EXAMPLE	SYMPTOMS	SOLUTION	SUGGESTED CHEMICAL(S)
	<p>Copper Unbalanced water, cheap copper algaecide and heater degradation CHARACTERISTICS</p> <ul style="list-style-type: none"> • Water appears to have a dark green or emerald tint. • Stain appears blue green to black on the surface. • Purple in presence of high stabiliser above 250ppm. 	<p>Focus Wipe Out Effectively removes staining caused by copper from the swimming pool surface.</p> <p>Focus Aquashield3 Ensures metals remain in solution and do not stain the surface</p>	
	<p>Iron Inferior salt, unbalanced water and bore water CHARACTERISTICS</p> <ul style="list-style-type: none"> • Water appears to have greenish or light brown tint • Stain appears orange reddish stain (like rust) 	<p>Focus Wipe Out Effectively removes staining caused by iron from the swimming pool surface.</p> <p>Focus Aquashield3 Ensures metals remain in solution and do not stain the surface</p>	
	<p>Manganese Use of bore water CHARACTERISTICS</p> <ul style="list-style-type: none"> • Water appears to have violet tint • Stain appears grey to black. 	<p>Focus Wipe Out Effectively removes staining caused by manganese from the swimming pool surface.</p> <p>Focus Aquashield3 Ensures metals remain in solution and do not stain the surface</p>	

Organic Stain

Leaves & debris sitting on pool surface

CHARACTERISTICS

- Stain appears to be rust or yellow

Focus Stain Off

Easily removes rust stains and calcium deposits.

Calcium Deposits on Pool Surface

High pH, high calcium and bore water

CHARACTERISTICS

- White deposits in clumps or over pool surface
- Rough to touch

Focus Stain Off

Easily removes rust stains and calcium deposits.

Focus Aquashield3

creates superb clarity in the water by ensuring calcium remains in solution and will keep build up on salt chlorinators soft.

Calcium Deposits on Salt Cell

High pH and high calcium

CHARACTERISTICS

- White deposits on cell
- Premature cell life
- Poor chlorine production

Focus Saf-T-Cell

a unique effervescent cell cleaner that works faster the heavier the deposits on the cell .

Focus Aquashield3

creates superb clarity in the water by ensuring calcium remains in solution and will keep build up on salt chlorinators soft.
